How to Play

Welcome to the official FIFA World Cup Fantasy 2026™, where you can compete by creating your own team of 15 players who will score points based on their actual performances during the FIFA World Cup 2026™, challenging your friends and millions of users globally.

Below is a step-by-step guide on how to play, including registration, creating and managing your team, making transfers, scoring and everything else you need to know to get you going.

Registration & Login

FIFA World Cup Fantasy 2026™ is completely free of charge. However, if you want to submit your team you'll need to log in or create a FIFA account. This can be also done once your team is created, after clicking the “SAVE” button.

Team Creation

Each user begins the game with a fixed Team Budget of \$100 million to assemble a squad of 15 players from a curated player list, where each player has a specific price. You must carefully select your squad to stay within this budget limit.

Your squad must include:

- 2 Goalkeepers
- 5 Defenders
- 5 Midfielders
- 3 Forwards

There will be restrictions on how many players you can select per Country depending on the stage of the tournament, outlined below:

Tournament Stage	Restriction
Group Stage	Max 3 players per Country
Round of 32	Max 3 players per Country
Round of 16	Max 4 players per Country
Quarter-final	Max 5 players per Country
Semi-final	Max 6 players per Country
Final	Max 8 players per Country

You can add players to your team by pressing the + icon next to any available player on the player pool.

You can remove players from your team by pressing the "X" icon located next to the player, or on the player profile, which can be opened by clicking on a player's shirt.

If you don't want to manually select your team, you have the option to autofill your team. This will create your team with randomly selected players.

When you press the save button, your Captain and Vice-Captain will be automatically selected. The most expensive player in your team will be assigned as Captain, and the second most expensive as Vice-Captain.

After saving the team for the first time, from your selected squad, 11 players will be placed in pitch view to form the starting XI. The remaining 4 players will be situated on the subs bench.

Your team will start with a default 4-4-2 formation, but this will automatically adjust based on the changes you make to your squad. You can switch between any of the following formations:

- 4-4-2
- 4-3-3

- 4-5-1
- 3-4-3
- 3-5-2
- 5-4-1
- 5-3-2

You can make unlimited changes to your team up until the first match of the FIFA World Cup 2026™ kicks off on Thursday, 11th June 2026.

Budget management

Each user receives a starting Team Budget of \$100m to build a 15-player squad, without exceeding the budget limit.

For the Knockout Phase, the Team Budget will increase by \$5m, this is to account for the higher player values of the remaining Countries. This adjustment ensures users can select relevant players while preserving the strategic challenge of the game.

The budget increase will be applied automatically once Round 3 locks and Round of 32 transfers open.

Player Prices

Each player has been assigned a price based on their potential to score fantasy points. Please note that all player prices are fixed and will not change based on performance throughout the tournament.

Captain and Vice-Captain

For each round, you must select a Captain and a Vice-Captain before the lockout. You will be able to change your captain and Vice-Captain by pressing the icon available in the player's profile.

Your selected Captain will score double points. If your captain doesn't play any minute during the matchday, your Vice-Captain will score double points instead.

However, the Vice-Captain will score double points ONLY if you have not done any changes to your team during a live round.

During a live round, you can change your captain an unlimited number of times, as long as the new selected captain is yet to play in the current round and your previous captain has completed his game.

If you choose to change your old captain, you will lose their double points, and your new captain will score double instead.

Team Management & Substitutions

Before each round locks out, you'll be able to make unlimited substitutions between your starting 11 and your bench players, as long as you keep a valid formation. Also, you can change your Captain and Vice-Captain as many times as you want.

Players on your substitute bench will score points each round but they will not count towards your score.

FIFA World Cup Fantasy 2026™ offers 2 types of substitutions:

- **Automatic Substitutions**

Your substitutes will become active in your team and replace a DNP (did not play) player in your starting 11 automatically ONLY if you have not made any manual changes to your team during the live round. Your outfield bench players are prioritised 1-3 with the first priority substitute being the first to replace a DNP player as long as it meets one of the valid formations.

Automatic substitutes will only happen at the end of a round allowing you to make manual substitutions up until the start of the final match of the round.

- **Manual Substitutions during a live Round**

You can replace a player from your starting 11 with someone from your bench, as long as the bench player hasn't played yet and your new lineup still follows a valid formation.

The player you're removing must not be playing live at the time, so you can make the change either before their game starts or after it ends.

Once you make the substitution, you'll only get points from the new player. If the player you remove has already completed their match, you won't be able to put them back into your starting 11 later.

Important: If you make any manual changes to your team during a live round - like a substitution or changing your Captain or Vice-Captain, it will cancel the automatic substitutions functionality. Once a manual change is made, auto subs won't happen for that matchday.

Team Changes during a Live Round

You can manually substitute any player in your starting XI who has completed their match with a

player from the bench whose match has not yet started.

You can swap an unlocked player in your lineup with an unlocked player on the bench at any time. This can be done repeatedly, as long as both players remain unlocked.

A locked player in your lineup (whose match is currently in progress) cannot be swapped with an unlocked player from the bench. They can only be substituted once the locked player's match is marked as complete.

A player on the bench (who has completed their match) cannot be substituted for an unlocked player in the starting XI.

A locked player in the lineup cannot be swapped with a locked player on the bench under any circumstance.

A locked player in the lineup that has completed his match cannot be swapped with another player on the bench who has also completed his match.

If you want to change your Captain or Vice-Captain during a round, you can do so as many times as you like. However, you can only select a player whose team has not yet played.

You can only change your Captain when their match is not in progress - either before the match starts or after it has been completed.

Important: If you make any manual changes to your team during a live round - like a substitution or changing your Captain or Vice-Captain, it will cancel the automatic substitutions functionality. Once a manual change is made, auto subs won't happen for that round.

Definitions:

Locked Player: A player whose team is currently playing a match.

Unlocked Player: A player whose team is yet to play.

Boosters

You will have the opportunity to use one of 5 available boosters:

- **Wildcard**

Will allow you to make unlimited transfers within a specific round (cannot be used for the first match of the group stage or for the round of 32)

- **12th Man**

Will allow you to select 1 additional player to score points for your team in a round. When selected, the 12th man cannot be substituted, captained or transferred. You can select any player to be your twelfth man, as long as that player is not already part of your squad. Budget or

team restrictions do not count here.

- **Maximum Captain**

Will allow you to get double points from whichever player scores the most points from your starting 11. This player will automatically be assigned the captaincy.

- **Qualification Booster:**

The Qualification Booster can be activated from the Round of 32 onwards. When activated, it grants **+2 points** to any player in your starting XI who progresses to the next round of the knockout stage or wins the final. To be eligible for the bonus, the player must play at least **1 minute** in the match.

If your captain is eligible for the qualification bonus, their **+2 points** won't be doubled.

- **Mystery Booster**

This booster will be revealed once Round 3 locks and the Round of 32 opens. It can be used for one round of the knockout stage, including the Final. Keep an eye out, you'll receive a pop-up notification once it becomes available.

All boosters activation (except the Wildcard) can be reversed before the round locks out. This will be simply done by clicking the button "deactivate" from the booster modal.

The Wildcard booster cannot be reversed after confirmation.

A booster can only be used once, and multiple boosters cannot be used at the same time.

Transfers

You will be given a limited allocation of free transfers to use over the course of FIFA World Cup 2026™ depending on the stage of the tournament. The limits on how many transfers you can make for each stage and matchday outlined below:

Tournament Stage	Transfer Allocation
Pre-tournament	Unlimited
Before start of Matchday 2	2 transfers
Before start of Matchday 3	2 transfers

Before start of Round of 32	Unlimited
Before start of Round of 16	4 transfers
Before start of Quarter-finals	4 transfers
Before start of Semi-finals	5 transfers
Before the Final	6 transfers

During the group stage, one transfer can be carried over into the next group stage Round. However, due to the unlimited transfer limit between the last game of Round 3 and the start of the Round of 32 you will not be able to carry a transfer over at this stage.

During any stage of the tournament, you can exceed your transfer allocation for that round but each additional transfer you make will deduct 3 points off your total points. The points will be deducted once the round locks out and your players will start scoring points.

Once a transfer is confirmed, you will not be able to reverse it.

You can make transfers only for the next scheduled round. If you make transfers during a live round, they will not affect your current team and will only apply from the next round onward.

Lockout

FIFA World Cup Fantasy 2026™ will feature a fixed lockout for transfers, along with a rolling lockout system to manage team changes during a live round.

Scoring System

Players will be awarded points based on their actual performances during the FIFA World Cup 2026™.

The metrics for scoring points are outlined below:

All Players

Action	Points
Appearance (Up to 60 minutes)	+1
Appearance (60+ minutes)	+1
Assist	+3
Yellow Card	-1
Red Card	-2
Own Goal	-2
Winning a penalty	+2
Conceding a penalty	-1

Goalkeepers

Action	Points
Clean Sheet (must have played 60+ minutes)	+5
First goal conceded	0
Each additional goal conceded	-1
Goal Scored	+9
Penalty save (not including shootouts)	+3
Every 3 Saves	+1

Defenders

Action	Points
Clean Sheet (must have played 60+ minutes)	+5
First goal conceded	0
Each additional goal conceded	-1
Goal scored	+7

Midfielders

Action	Points
Clean Sheet (must have played 60+ minutes)	+1
Goal scored	+6
Every 3 tackles	+1
Every 2 chances created	+1

Forwards

Action	Points
Goal scored	+5
Every 2 shots on target	+1

Bonus Points

Action	Points
Goal from direct free-kick If any of your players scores a goal from a direct free-kick (in addition to the goal points)	+1
Scouting bonus If any of your players scores more than 4pts in a match and is in fewer than 5% of all teams' selection	+2

Leaderboards

Once your team has been saved, it will automatically be entered in the overall leaderboard where you can see where you stand against others. The overall leaderboard includes all other users who have entered a team.

You will also be able to see your ranking within a single round.

Rankings are based on the total number of points your team earns during that round.

In addition, you'll compete on the below leaderboards based of your supporting Country:

- **Country Supported Leaderboard**

Users are ranked based on their Fantasy points and compete directly against others who support the same team.

You can also view the standings of other Countries, but you will only appear in the leaderboard of the Country you selected.

- **Country Championship Leaderboard**

This leaderboard highlights the best-performing teams based on the total Fantasy points accumulated by their fans. When you choose a team (e.g., Brazil) as your "Team Supported," your fantasy team points are added to that team's overall score. The leaderboard aggregates the

points from all users who selected the same team.

- **Confederation Challenge Leaderboard**

This leaderboard showcases the top-performing Confederations based on the fantasy points earned by their fans.

Points are calculated by grouping users according to the Confederation of the team they selected as their "Team Supported" during their team creation.

Mini Leagues

You can create and join an unlimited number of public or private mini leagues over the duration of FIFA World Cup 2026™.

Creating a public league means that this will be openly available for all users to join from the "Join a League" page.

Creating a private league means that others can only join this league if you share the league information with them via:

Sharing the league code or link

Inviting via social media (Facebook or X)
